

EXHIBIT A

SUPREME COURT OF THE STATE OF NEW YORK
COUNTY OF WESTCHESTER

TOMASZ OLFANS,

Plaintiff,

-against-

RICARDO A TORIBIO CALDERON, NATHAN
VANDERSLICE, AND JOSE HERRERA,

Defendants,

**EXPERT WITNESS
DISCLOSURE**

Index Number: 59291/22

Please take notice that the following is the response of the defendant, Nathan J. Vanderslice, to plaintiff's request for expert disclosure pursuant to § 3101(d) of the CPLR:

1. Defendant expects to call Dr. Ronald D. Snyder of 256 Old Nyack Turnpike, Spring Valley, NY 10977, an orthopedist, as an expert witness at the trial in the above matter.

2. The subject matter upon which Dr. Ronald D. Snyder is presently expected to testify is set forth in detail in his report dated May 2, 2023, a copy of which is attached hereto and incorporated by reference herein.

3. The facts and opinions upon which Dr. Ronald D. Snyder is expected to testify are based on his physical examination of the plaintiff, Tomasz Olfans, and his review of the plaintiff's medical records.

4. The grounds for Dr. Ronald D. Snyder's opinion come from his education, training and experience in the fields of Medicine and Orthopedics, his physical examination of the plaintiff, Tomasz Olfans, on April 19, 2023, and his review of the plaintiff's medical records, and are set forth in Dr. Ronald D. Snyder's report, dated May 2, 2023.

5. Dr. Ronald D. Snyder's qualifications are set forth in his Curriculum Vitae, a copy of which is annexed hereto.

6. The grounds of Dr. Ronald D. Snyder's opinions are based upon his review of the Orthopedics report and the documents and testimony received into evidence during the trial of this action and the circumstances surrounding this incident. The defendant reserves the right to modify or supplement this answer.

Re: Olfans, Tomasz
Claim #: 5209J755T
EW/GC Case #: 21945451
DOI: July 10, 2020
Request Type: Liability IME

To Whom It May Concern:

I performed an independent orthopedic examination on the above-claimant on April 19, 2023, in my White Plains, New York office and provided valid photo identification.

The claimant did not fill out the intake form in its entirety as per his attorney's advice.

The claimant was accompanied by Mark, (*IME Companion*).

The history and examination findings are as follows:

INJURY HISTORY: The claimant did not provide any information regarding the accident, injuries, or immediate treatment on the intake form.

WORK/EMPLOYMENT HISTORY: The claimant did not provide any information regarding his occupational history or current work status on the intake form.

PAST MEDICAL HISTORY: Past medical history, as reported by the claimant, is negative.

The claimant did not provide any information regarding his prior injuries/accidents.

PRIOR/UNRELATED SURGICAL HISTORY: Mr. Olfans did not report any prior/unrelated surgical history.

MEDICATION USE:

Mr. Olfans indicated that he is using pain medication as needed.

Examinee Name: Olfans, Tomasz
Examination Date: April 19, 2023

TREATMENT HISTORY TO DATE:

According to the claimant, he had left knee surgery performed in 2022.

MEDICAL RECORDS REVIEWED:

- Verified Bill of Particulars dated 08/22/22. (Index #: 59291/2022)
- Follow-up exam reports from Chloe Brown, PA of McCulloch Orthopaedic Surgical Services, PLLC dated 03/10/21 to 04/22/21.
- Progress reports from Michael Gerling, M.D. of Center for Musculoskeletal and Neurological Care – Manhattan dated 05/17/22 to 09/06/22.
- Patient record report dated 07/10/20.
- ER report from Cristina Ho, M.D. of CityMD Eastchester dated 07/11/20.
- Evaluation reports from All Boro Medical Rehabilitation dated 07/17/20 to 07/15/22.
- EMG/NCV study report of the lower extremity from Felix Karafin, M.D. dated 11/20/20. Impression: The above electrodiagnostic study reveals evidence of left C6-C7 and right L5-S1 radiculopathy.
- Initial consult report from Luke Carey, PA of McCulloch Orthopaedic Surgical Services, PLLC dated 02/09/21.
- Follow-up exam reports from Kenneth McCulloch, M.D. of McCulloch Orthopaedic Surgical Services, PLLC dated 06/17/21 to 07/29/22.
- Operative report from Fifth Avenue Surgery Center, LLC dated 03/07/22. Pre-operative diagnosis: Left knee medial meniscus tear. Post-operative diagnosis: Left knee medial meniscus tear as well as synovitis. Procedure: (1) Left knee arthroscopic partial medial meniscectomy. (2) Left knee arthroscopic synovectomy.
- PostOp visit reports from New York Sports & Joints Orthopaedic Specialists dated 03/17/22 to 06/09/22.
- Work notes from All Boro Medical Rehabilitation, PLLC dated 09/11/20 to 04/16/21.
- Medical record reports from White Plains Hospital dated 08/16/13 to 02/04/14.
- ED summary report from White Plains Hospital dated 07/11/20.
- Evaluation report from White Plains Hospital dated 07/11/20.
- CT scan report of the cervical spine without contrast from White Plains Hospital Center dated 07/11/20. Impression: No acute fracture or subluxation. Other findings as above.
- CT scan report of the head without contrast from White Plains Hospital Center dated 07/11/20. Impression: No evidence of intracranial hemorrhage or acute infarction.
- PHA order from White Plains Hospital Center dated 07/11/20.
- Patient order summary report from White Plains Hospital Center dated 07/11/20.
- Medication discharge summary report from White Plains Hospital Center dated 07/11/20.
- EDM patient record report from New York – Presbyterian dated 07/15/20.
- Evaluation report from New York – Presbyterian Lawrence Hospital dated 07/15/20.
- Discharge summary report from New York – Presbyterian dated 07/15/20.

Examinee Name: Olfans, Tomasz

Examination Date: April 19, 2023

- CT scan report of the cervical spine without intravenous contrast from New York – Presbyterian Lawrence Hospital dated 07/15/20. Impression: No evidence of acute cervical spine fracture. Multilevel degenerative change of the cervical spine, as described.
- Medication discharge summary report from New York – Presbyterian Lawrence dated 07/15/20.
- MRI report of the cervical spine without contrast from Kolb Radiology dated 06/02/22. Impression: (1) Disc herniation at C5-C6 with central and bilateral foraminal narrowing and direct impingement upon the spinal cord, with no interval change. (2) Large central to right paracentral disc herniation at C6-7 with central, right lateral recess and bilateral foraminal narrowing, right greater than left. There is direct impingement upon the spinal cord. No interval change.
- MRI report of the lumbar spine without contrast from Kolb Radiology dated 06/02/22. Impression: (1) Disc herniations at L2-3 and L5-S1 impinging upon the thecal sac and the bilateral extra thecal S1 nerve roots, with no interval change. (2) Disc bulge L4-5.
- MRI report of the left knee without contrast from Kolb Radiology dated 09/04/20. Impression: (1) Intra substance tear of the posterior horn medial meniscus. (2) Partial tear of the anterior cruciate ligament. (3) There is chondral defect at the anterior aspect of the medial femoral condyle. Joint effusion.
- MRI report of the cervical spine without contrast from Kolb Radiology dated 09/07/20. Impression: (1) Disc herniation at C5-6 impinging upon the spinal cord with narrowing of the neural foraminal bilaterally. (2) Disc herniation at C6-7 is right paracentral impinging upon the thecal sac, right lateral recess and narrowing the neural foramina bilaterally, right greater than left. The herniation also impinges upon the spinal cord.
- MRI report of the lumbar spine without contrast from Kolb Radiology dated 09/07/20. Impression: (1) Shallow subligamentous disc herniation L5-S1 impinging upon the thecal sac abutting the bilateral extra thecal S1 nerve roots. (2) There is also a focal central posterior disc herniation at L2-3 impinging upon the thecal sac. (3) Disc bulge at L4-5.
- PT daily notes from All Boro Medical Rehabilitation, PLLC dated 06/17/21.
- Evaluation lumbar report from Dr. Alex Chan dated 07/21/20.
- Daily notes OV cervical P1/P2 from Dr. Nicole Dutra dated 07/23/20 to 07/30/20.
- Daily notes OV cervical P1/P2 from Dr. Brandon Hulasiya dated 07/27/20 to 08/17/20.
- Daily notes OV cervical P1/P2 from Dr. Alex Chan dated 08/06/20.
- Diagnosis & treatment plan report dated 07/22/20.
- Progress notes from Dr. Larry Piretra dated 08/10/20 to 08/25/20.
- Daily notes OV cervical P1/P2 from Dr. Christopher Repecki dated 08/13/20.
- Progress note lumbar from Dr. Larry Piretra dated 08/19/20.
- Daily notes OV cervical P1/P2 from Dr. Larry Piretra dated 08/12/20.
- Daily notes OV cervical P3 from Dr. Larry Piretra dated 08/26/20 to 09/23/20.
- Daily note OV cervical P3 from Dr. Kristina Bilanova dated 08/27/20.
- Daily note OV cervical P3 from Dr. Joshua Wasserman dated 09/11/20.

Examinee Name: Olfans, Tomasz
Examination Date: April 19, 2023

PHYSICAL DESCRIPTION: The claimant is a 5' 11" tall and weighs 190 lbs., 31-year-old male, with blue eyes.

SYMPTOMATOLOGY: The claimant did not provide any information regarding his current areas of pain.

GENERAL OBSERVATIONS: The claimant had a normal appearance and posture.

No limp or antalgic gait was observed.

He was asked to inform me as to any pain or tenderness during the examination. All ROM measurements were taken with the aid of a standard hand-held goniometer. ROM normal values are in accordance with both the NYS WC guidelines and AMA guidelines, 5th Edition.

EXAMINATION OF THE CERVICAL SPINE: Examination of the cervical spine revealed no spasms. There was no paraspinal tenderness or trapezii tenderness to palpation. Neurological examination of the upper extremities demonstrated normal muscle testing to be 5/5 throughout. Sensory responses were intact throughout the upper extremities. Deep tendon reflexes of the biceps, triceps and brachioradialis were 2+ and equal bilaterally. Spurling's test was negative. Axial load test was positive to the left shoulder.

CERVICAL SPINE

RANGE OF MOTION	NORMAL	CLAIMANT
FLEXION	50°	50°
EXTENSION	60°	50°
RIGHT ROTATION	80°	50°
LEFT ROTATION	80°	50°
RT. LATERAL FLEXION	45°	25°
LT. LATERAL FLEXION	45°	25°

EXAMINATION OF THE LUMBAR SPINE: Examination of the lumbar spine revealed no paraspinal spasms. There was no paraspinal tenderness upon palpation. Neurological examination of the lower extremities demonstrated muscle testing to be 5/5 throughout. Sensory responses were intact throughout the lower extremities. Patellar and Achilles reflexes were 2+ and equal bilaterally. Straight leg raise test negative with left leg elevated to 70 degrees and right leg elevated to 60 degrees. Seated straight leg raising test was negative. Acetabular rotation test was positive. Waddell's signs were positive. The claimant was able to arise on heels and toes.

LUMBAR SPINE

RANGE OF MOTION	NORMAL	CLAIMANT
FLEXION	60°	50°
EXTENSION	25°	20°
RT LATERAL BENDING	25°	20°
LFT LATERAL BENDING	25°	20°

Examinee Name: Olfans, Tomasz
Examination Date: April 19, 2023

EXAMINATION OF THE RIGHT KNEE: Examination of the right knee revealed no tenderness to palpation. There was no effusion. There was no atrophy of the quadriceps. McMurray’s test was negative. Lachman’s test was negative. Anterior drawer sign was negative. Posterior drawer sign was negative. Patello-femoral crepitus was not present. Valgus & Varus stress test was stable. The claimant lacks additional objective findings.

RIGHT KNEE

RANGE OF MOTION	NORMAL	CLAIMANT
FLEXION	150°	90°
EXTENSION	0°	0°

There was suboptimal during the examination.

EXAMINATION OF THE LEFT KNEE: Healed portal incisions were noted. Examination of the left knee revealed medial and lateral joint line tenderness to palpation. There was no effusion. There was no atrophy of the quadriceps. McMurray’s test was negative. Lachman’s test was negative. Anterior drawer sign was negative. Posterior drawer sign was negative. Patello-femoral crepitus was not present. Valgus & Varus stress test was stable. The claimant lacks additional objective findings.

LEFT KNEE

RANGE OF MOTION	NORMAL	CLAIMANT
FLEXION	150°	90°
EXTENSION	0°	0°

There was suboptimal during the examination.

HEAD TRAUMA/LOSS OF CONSCIOUSNESS/CONCUSSION/POST-CONCUSSION SYNDROME/POSTTRAUMATIC STRESS/ANXIETY: I defer comment to the appropriate specialty.

DIAGNOSES: The claimant presents with diagnoses of:

1. Cervical spine sprain/strain, resolved.
2. Lumbar spine sprain/strain, resolved.
3. S/P Left knee arthroscopic surgery on March 7, 2022, recovered.

DISCUSSION: Upon examination, the claimant did exhibit decreased range of motion. It should be noted that the findings of range of motion testing are subjective and represent voluntary movements, which are fully under the control of the claimant being examined, and therefore, are not a truly objective finding. Positive acetabular rotation test and positive axial load test is a Waddell's sign and suggests a possible non-organic component to pain.

DISABILITY: In my opinion, currently there is no orthopedic causally related disability.

Examinee Name: Olfans, Tomasz
Examination Date: April 19, 2023

I, Ronald D. Snyder, M.D. M.S. being a Diplomate of the American Board of Orthopaedic Surgery, am duly licensed to practice medicine in the State of New York. I affirm, under the penalties of perjury, that the information contained within this document was prepared and is the work product of the undersigned, and is true to the best of my knowledge and information.

If any additional information is made available for my review, I will be happy to re-evaluate my position at that time.

It is understood that no doctor/patient relationship exists or is implied by this examination. This individual was examined with reference to the specific complaints emanating from the original injury. Any other medical conditions, which were either unreported or felt to be unrelated to the original injury are considered to be beyond the scope of this examination.

All opinions expressed are based upon a reasonable degree of medical certainty.

I, Ronald D. Snyder, M.D. M.S., hereby affirm pursuant to CPLR 2106 under the penalties of perjury that I am a physician, duly licensed to practice medicine in the State of New York and I am not a party to the action herein. I further affirm pursuant to CPLR 2106 and under the penalties of perjury that the statements made in this report are true and accurate.

I attest to having the scope of licensure or certification that typically manages the medical condition, procedure, treatment, or issue in this case. I have current, relevant, knowledge and experience to render an opinion for this case, and my opinions and conclusions are based solely upon the review of the records submitted as well as the results of my examination, if applicable. There is no conflict of interest known to me regarding this specific case. I have received no financial incentive or compensation that is dependent in any way on the opinion I have rendered. No delegation of this examination and/or review was rendered.

Sincerely,

Ronald D. Snyder, M.D. M.S.
